## INTRODUCTION

This report provides the 1971 and 1976 population figures<sup>date</sup> related to unincorporated places, which are indicated in alphabetical order giving the province, census division and census consolidated subdivision in which each is located. The population figures do not include persons temporarily absent from their usual place of residence on Census Day or from outside Canada. The undercounts therefore are higher for these places than for other geostatistical areas. Only unincorporated places with a population of 25 or more at the time of the 1976 Census are shown.

For the purpose of the 1976 Census, any cluster or group of five or more permanently occupied dwellings locally known by a specific name is considered to be an unincorporated place. Excluded from this concept are clusters of dwellings with locally known names which occur within cities, towns and villages.

In order to provide a uniform method of delineation, Census Representatives were instructed to identify all clusters of dwellings fulfilling these criteria distinctly on their records. Some degree of individual judgement is involved in this process however, since unincorporated places have no legally defined boundaries. Unincorporated places do not necessarily follow the boundaries of enumeration areas. This is why an urban concentration and an unincorporated place, both having the same name, might have a slightly different population.

### DEFINITIONS

**Province:** Major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified. There are ten provinces which are divided into federal electoral districts, census divisions, census subdivisions, etc. In census publications, provincial tables include the Yukon and Northwest Territories.

**Census Division (CD):** General term applying to counties, regional districts, regional municipalities, etc. In Newfoundland, Manitoba, Saskatchewan and Alberta, the term describes geostatistical areas that have been created by Statistics Canada in co-operation with the province as an equivalent for counties.

**Census Subdivision (CSD):** General term applying to municipalities, Indian Reserves, unorganized territories and subdivisions. In Newfoundland, Nova Scotia and British Columbia, the term also describes geostatistical areas that have been created by Statistics Canada in co-operation with the province as an equivalent for municipalities. It should be noted that the parts of Flin Flon falling in Manitoba and Saskatchewan, and the parts of Lloydminster falling in Saskatchewan and Alberta are treated as separate CSDs.

**Census Consolidated Subdivision (CCS):** Geostatistical area constituted by grouping all the census subdivisions (CSDs) located geographically within the boundaries of a large CSD. A large CSD having no other CSD within its boundaries is considered to be one census consolidated subdivision. CCS is similar in function to "Reference Code" in the 1971 Census.

**Enumeration Area (EA):** The spatial unit canvassed by one Census Representative. It is defined according to the following criteria: (1) Population — An enumeration area may include as many as 375 households, depending on its location; (2) Number of Farms — An enumeration area always includes fewer than 100 farms; (3) Limits — An enumeration area, being the building-block of all geostatistical areas, never cuts across any area recognized by the census. Moreover, enumeration area boundaries are such that the Census Representative will be able to locate them without difficulty as, for example, streets, roads, railways, rivers and lakes.

Ce bulletin présente les chiffres de population de 1971 et de 1976 relatifs aux localités non constituées qui sont indiquées en ordre alphabétique et donne, pour chaque localité, la province, la division de recensement et la subdivision de recensement unifiée. Les chiffres de population n'incluent ni les résidents de l'extérieur du Canada, ni les personnes temporairement absentes de leur domicile habituel le jour du recensement. Le sous-dénombrement est donc plus élevé que pour les autres unités géostatistiques. Seules les localités non constituées de 25 habitants et plus, au recensement de 1976, sont montrées.

Aux fins du recensement de 1976, tout groupe de cinq logements et plus occupés en permanence et connu localement sous un nom précis est considéré comme une localité non constituée. Sont exclus de cette catégorie les groupes de logements qui ont des noms connus localement et qui sont situés à l'intérieur des cités, villes et villages.

En vue de délimiter ces localités d'une façon uniforme, on a demandé aux représentants du recensement d'indiquer séparément dans leur dossier tous les groupes de logements répondant à ces critères. Cette méthode faisait toutefois appel au jugement de chacun, car les localités non constituées n'ont pas de limites définies par la loi. Les localités non constituées ne suivent pas nécessairement les limites des secteurs de dénombrement. C'est pourquoi une concentration urbaine et une localité non constituée, de même nom, peuvent avoir une population légèrement différente.

### DÉFINITIONS

**Province:** Principale division politique du Canada. Du point de vue statistique, c'est une unité de base pour laquelle toutes les données sont totalisées et recoupées. Il y a dix provinces, divisées en circonscriptions électorales fédérales, en divisions de recensement, en subdivisions de recensement, etc. Dans les publications du recensement, les tableaux relatifs aux provinces comprennent le Yukon et les Territoires du Nord-Ouest.

**Division de recensement (DR):** Terme générique qui désigne les comtés, les districts régionaux, les municipalités régionales, etc. À Terre-Neuve, au Manitoba, en Saskatchewan et en Alberta, l'expression désigne les unités géostatistiques créées comme équivalent des comtés et délimitées par Statistique Canada en collaboration avec les provinces.

**Subdivision de recensement (SDR):** Terme générique désignant les municipalités, les réserves indiennes, les territoires non municipalisés et les subdivisions de recensement. À Terre-Neuve, en Nouvelle-Écosse et en Colombie-Britannique, l'expression désigne également des unités géostatistiques créées comme équivalent des municipalités et délimitées par Statistique Canada en collaboration avec la province. Il est à noter que les parties de Flin Flon qui se trouvent au Manitoba et en Saskatchewan, et celles de Lloydminster qui se trouvent en Saskatchewan et en Alberta sont considérées comme des subdivisions de recensement distinctes.

**Subdivision de recensement unifiée (SRU):** Unité géostatistique formée par le groupement de toutes les subdivisions de recensement situées à l'intérieur des limites d'une grande subdivision de recensement. On considère qu'une grande subdivision de recensement est une subdivision de recensement unifiée même si elle ne renferme pas d'autre subdivision de recensement. La subdivision de recensement unifiée joue le rôle du code de référence dans le recensement de 1971.

**Secteur de dénombrement (SD):** L'unité spatiale recensée par un représentant du recensement. Elle est définie suivant les critères suivants: (1) Population — Un secteur de dénombrement peut comprendre jusqu'à 375 ménages, selon sa localisation; (2) Nombre de fermes — Un secteur de dénombrement comprend toujours moins de 100 fermes; (3) Limites — Un secteur de dénombrement, étant l'unité de base de toutes les unités géostatistiques, ne débordé jamais une région reconnue par le recensement. Par ailleurs, les limites des secteurs de dénombrement sont telles que le représentant du recensement est en mesure de les localiser sans difficulté, par exemple, rues, chemins, voies

**DEFINITIONS — Concluded**

Enumeration areas are normally the smallest geographic units for which census data are available.

**SAMPLING AND WEIGHTING**

The information in this report was collected on a 100% basis and as such represents the official census counts. All table headings are noted accordingly.

**COVERAGE ERROR**

A coverage error occurs in the census whenever a person or a household is missed completely or counted more than once. Since overcoverage is fairly rare in relation to undercoverage, the net effect of such errors is to introduce a downward bias in census figures, so that the published census estimates tend to underestimate the actual population.

A special study was undertaken in relation to the 1976 Census to measure the extent of the bias due to undercoverage. This study estimated the over-all undercoverage rate to be of the order of 2% of the total population.

Evidence from studies of coverage errors in earlier censuses indicates that undercoverage is not evenly distributed throughout the population but tends to be higher in certain segments of the population, e.g., young male adults, recent immigrants.

Further details on this study may be obtained by contacting Census Information Services (see back cover).

**SYMBOLS**

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.

**DÉFINITIONS — fin**

ferrées, rivières et lacs. Les secteurs de dénombrement constituent normalement les plus petites unités géographiques pour lesquelles on peut obtenir des données de recensement.

**ÉCHANTILLONNAGE ET PONDÉRATION**

Les renseignements de la présente publication ont été recueillis à 100 % et représentent les chiffres officiels de recensement. Les titres des tableaux sont annotés en conséquence.

**ERREUR DE COUVERTURE**

Une erreur de couverture se glisse chaque fois qu'une personne ou un ménage sont omis ou comptés plus d'une fois. Étant donné que le surdénombrement est assez rare par rapport au sous-dénombrement, les erreurs de couverture introduisent un biais vers le bas dans les estimations du recensement de sorte que ces dernières ont tendance à sous-représenter la population réelle.

On a mené une étude spéciale concernant le recensement de 1976 afin de mesurer l'importance des biais attribuables au sous-dénombrement. On a estimé que le taux global du sous-dénombrement représentait 2 % de la population totale.

Des études d'erreurs de couverture effectuées à l'occasion de recensements antérieurs ont révélé que le taux de sous-dénombrement n'était pas également réparti dans toute la population, mais qu'il avait tendance à être plus élevé pour certains segments de la population, par exemple, chez les jeunes adultes de sexe masculin et les nouveaux immigrants.

On peut obtenir de plus amples renseignements sur cette étude en communiquant avec Information recensement (voir la couverture arrière).

**SIGNES CONVENTIONNELS**

- .. non disponible.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- infimes.

## Publications of the 1976 Census of Canada

This bulletin is one of a series of volume reports of the 1976 Censuses of Population, Housing and Agriculture.

Most of the bulletins in the regular Volume Series are data-oriented. Other reports containing more methodological, interpretative and evaluative content, are also issued. These are as follows:<sup>1</sup>

- (a) 1976 Census Administrative Report
- (b) 1976 Census Quality of Data Series
  
- (c) 1976 Census Research Series
- (d) Introductory Reports to each of the regular Volume Series.

Also available on request is a series of Reference Lists developed largely for internal verification of basic geographical and population hierarchies, which could provide useful information to the outside user.

Users will note that the majority of census publications are colour-coded to identify with the four themes central to the presentation and to maintain comparability with the 1971 series, e.g., blue for Geographical and Demographic content, brown for Housing, Household and Family data, red for Economic Characteristics and gold for the series based on Agriculture.

These reports are listed in the *1976 Census Catalogue* which can be obtained free of charge from:

Publications Distribution,  
Room 1200, Statistics Canada,  
Ottawa, Ontario.  
K1A 0T6

To order **census publications**, send a cheque or money order made payable to the Receiver General for Canada, to the above address.

In addition to published documents, the Census of Canada can provide **other products and services** about census: data on microform (film or fiche), computer tapes, computer print-outs, user-specified tables, maps, geographic files, geographic lists, etc.

For information write:

**Census Information Services,**  
Statistics Canada,  
Ottawa, Ontario.  
K1A 0T7

or call (613) 996-5254.

**Inquiries** about census and other **Statistics Canada information** can also be directed to Statistics Canada Regional Offices located in: St. John's (Nfld.), Halifax, Montréal, Ottawa, Toronto, Winnipeg, Regina, Edmonton and Vancouver.

<sup>1</sup> It should be noted that these publications are generally released somewhat later than the data reports.

## Publications du recensement du Canada de 1976

Ce bulletin fait partie de la série des publications des recensements de 1976 de la population, du logement et de l'agriculture.

La plupart des bulletins de la série ordinaire des volumes présentent des données. On publie également d'autres bulletins dont le contenu vise plutôt la méthodologie, l'interprétation et l'évaluation. Ces bulletins sont les suivants<sup>1</sup>:

- a) Rapport administratif du recensement de 1976
- b) Série relative à la qualité des données du recensement de 1976
  
- c) Série du recensement de 1976 relative à la recherche
- d) Introductions à chacune des séries ordinaires des volumes.

Vous pouvez aussi vous procurer sur demande une série de Listes de référence, servant surtout à la vérification interne des catégories géographiques et démographiques de base, qui pourraient fournir des renseignements utiles aux utilisateurs à l'extérieur de Statistique Canada.

Les utilisateurs constateront que la plupart des publications du recensement sont classées par couleur, chaque couleur correspondant à l'un des quatre thèmes du recensement; cela permet d'assurer la comparabilité avec les séries de 1971; ainsi, le bleu est réservé aux publications de nature géographique et démographique, le brun, aux bulletins sur le logement, les ménages et les familles, le rouge, aux publications de nature économique et la couleur or, à la série relative à l'agriculture.

Ces bulletins figurent au *Catalogue du recensement de 1976* que vous pouvez obtenir gratuitement auprès de:

Distribution des publications  
Pièce 1200, Statistique Canada  
Ottawa (Ontario)  
K1A 0T6

Envoyez vos commandes de **publications du recensement** à cette même adresse en y joignant un chèque ou un mandat postal à l'ordre du Receveur général du Canada.

Outre les publications, le Recensement du Canada offre divers **autres produits et services**: données en microcopie (film ou fiche), bandes pour ordinateurs, états mécanographiés, totalisations spéciales, cartes, fichiers et listes géographiques, etc.

Pour obtenir des renseignements, écrivez à:

**Information recensement**  
Statistique Canada  
Ottawa (Ontario)  
K1A 0T7

ou téléphonez au numéro (613) 996-5254.

Toute **demande de renseignement** sur le recensement et les autres **données de Statistique Canada** peut également être transmise aux bureaux régionaux de Statistique Canada situés à St. John's (T.-N.), Halifax, Montréal, Ottawa, Toronto, Winnipeg, Regina, Edmonton et Vancouver.

<sup>1</sup> Il convient de remarquer que ces bulletins sont généralement publiés quelque temps après les bulletins présentant des données.
